TROCKENES VERLEGEN AUF RASEN

Besonders in Gärten und Grünanlagen können mit dieser Verlegeart schnell begehbare Wege geschaffen und Gemeinschaftsbereiche stilvoll, individuell gestaltet werden.

Verlegt werden die Platten auf einen vorher geschaffenen Untergrund aus Kies. Das Kiesbett erhöht die Stabilität und gleicht eventuelle Unregelmäßigkeiten des Bodens aus. Ausreichend breite Fugen ermöglichen dabei ein natürliches Wachstum des Rasens.

🔑 Vorteile

EINFACH ZU INSTALLIEREN, OHNE DIE VERWENDUNG VON KLEBMITTELN MÖGLICHKEIT ZUR ENTFERNUNG UND WIEDERVERWENDUNG DER PLATTEN FLECKENBESTÄNDIG, SÄUREBESTÄNDIG UND LEICHT ZU REINIGEN, FROSTBESTÄNDIG

VERLEGUNG IM SPLITTBETT

Einfach und schnell: Das trockene Verlegen auf Kies benötigt weder Kleber noch Spachtelmasse, ist einfach auszuführen und sofort begehbar.

Außerdem kann das Regenwasser absickern und die Platten können später wieder entfernt und an anderer Stelle wiederverwendet werden.

🔑 Vorteile

EINFACH ZU INSTALLIEREN, OHNE DIE VERWENDUNG VON KLEBMITTELN MÖGLICHKEIT ZUR ENTFERNUNG UND WIEDERVERWENDUNG DER PLATTEN FLECKENBESTÄNDIG, SÄUREBESTÄNDIG UND LEICHT ZU REINIGEN, FROSTBESTÄNDIG

ERHÖTES VERLEGEN MIT TRÄGERN

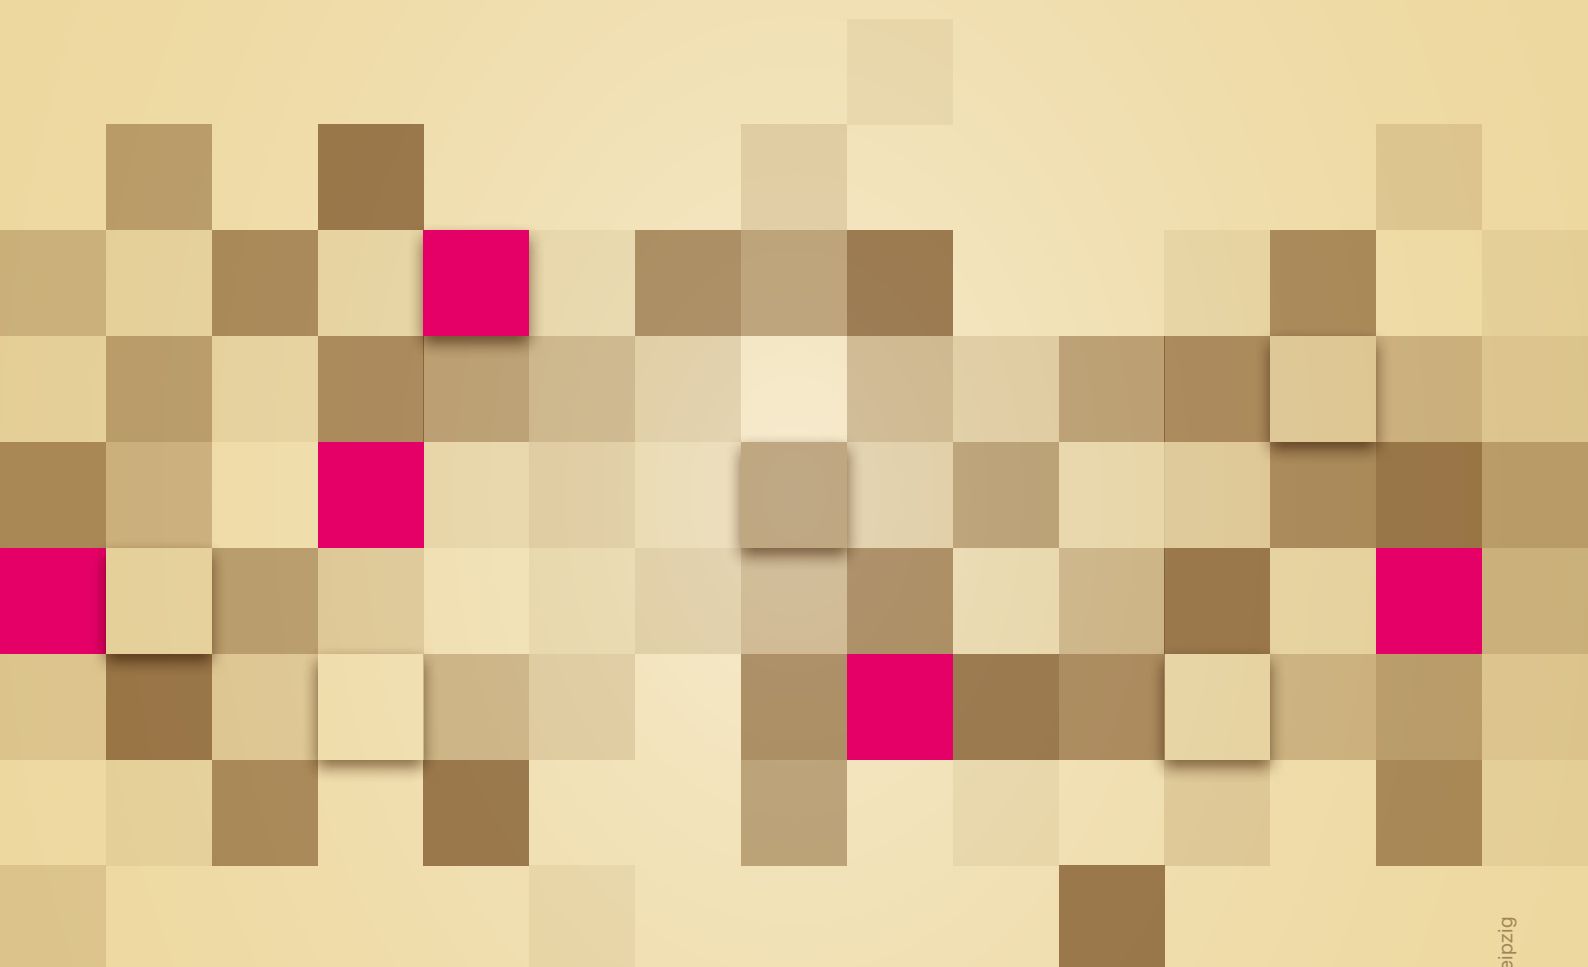

Leicht zu installieren und sofort begehbar. Das erhöhte Verlegen ermöglicht die Schaffung eines Hohlraumes zwischen Trittpläche und Boden, ein leichtes Abfließen des Regenwassers und die einfache Passage von Hydraulik- und Elektroanlagen.

Diese Lösung kann sowohl auf einem bereits vorhandenen Fußboden als auch auf einem groben Zementestrich angewendet werden.

🔑 Vorteile

MÖGLICHKEIT ZUR ENTFERNUNG UND WIEDERVERWENDUNG DER PLATTEN EINFACH ZU INSTALLIEREN, OHNE DIE VERWENDUNG VON KLEBMITTELN FLECKENBESTÄNDIG, SÄUREBESTÄNDIG UND LEICHT ZU REINIGEN INSPIZIERBARKEIT DES HOHLRAUMS UND DIE MÖGLICHKEIT ZUR VERLEGUNG VON ANLAGENKABELN, FROSTBESTÄNDIG
